

Background

St John's College of Science & Technology is a unique College of higher learning established to advance transformation of students into employable, service oriented, highly skilled, self-sustaining, morally & ethically competent workforce with strong holistic and intellectual development. Unemployment rate is about 2.28 in Uganda and about 83% among 15-24 year olds. 3.2% of youth working for waged employment, 90.9% working for informal employment, and 5% self-employed. Although 60,000-70,000 students in Uganda leave secondary education each year, 35 % of them are able to find places in limited number of higher institutions leaving many with the option of Vocational & Technical education. There is also a serious disconnect between the qualifications of graduates from various institutions of higher learning and vocational skills needed for the jobs that are in demand for workers (employability). It is against this background that St Johns College of Science & Technology (a skills institute) was established to undertake academic & professional training purposed to bridge this skills gap.

Our Courses

National Certificates

- National Certificate in Agriculture (NCA)
- National Certificate in Fashion & Garment Design (NCFD)
- National Certificate in Information and Communication Technology (NCICT)
- National Certificate in Welding & Fabrication (NCWF)
- National Certificate in Plumbing (NCPL)
- National Certificate in Building Construction

National Junior Vocational Certificates

- Block laying & concrete practice (BCP)
